MISSION

The society's statute envisages a three pronged approach

- To raise public awareness that chronic exposure to excessive noise can cause auditory damage and even total hearing loss, apart from being a stress inducing health hazard and a nuisance at more moderate levels,
- To increase the overall awareness into effective lobbying for appropriate legislative and regulatory controls and remedies to be implemented
- To provide effective support to members directly affected by noise pollution

VISION

The statute also envisions that noise should, in the shortest possible time, become managed efficiently enough so that the quality of life in Malta improves through establishing a peaceful and decent environment, free from noise pollution in all its forms and any consequent health hazards
