Regulator's Code of Practice

Principle 1: The responsibilities of the regulator should be clear and objectively stated.

Key Issues:

1. Responsibilities of the regulator should be clear and objectively set out, preferably by law.
2. Legislation should be designed to ensure that any division of responsibility among regulators avoids gaps or inequities.
Where there is a division of regulatory responsibilities, substantially the same type of conduct generally should not be subject to inconsistent regulatory requirements.
3. There should be effective cooperation among responsible authorities, through appropriate channels.

Principle 3: The regulator should have adequate powers, proper resources and the capacity to perform its functions and exercise its powers
